Educational Quality Marking Criteria

Principle	Criterion	2 - Strong	1 - Adequate	0 - Weak/absent
Cognitive Load	Clear - Learning Focus	Clearly teaches one specific concept or skill	Learning focus is present but broad or unclear	No clear educational concept or skill is taught
	Information Clarity	Key information is clearly emphasised	Key information is present but not always clearly emphasised	Key information is unclear or difficult to identify
	Information Structure	Information is organised into clear, manageable ideas/ steps	Some organisation, but parts are rushed	Information is overloaded or poorly organised
	Distractions	Audio, visuals and effects support the content without distraction	Some unnecessary elements are present	Distractions interfere with understanding
	Multimedia Support	Visuals, audio, text, or demonstrations effectively support understanding	Media is relevant but provides limited support	Media does not support understanding
Student Engagement	Language CLarity	Clear language; complex terms are appropriately explained	Mostly understandable, but some terms/ideas are unexplained	Language makes content difficult to understand
	Engaging Delivery	Clear, expressive, and appropriately paced	Generally clear but rushed, slow or monotone at times	Delivery makes content difficult to follow
	Educational Hook	Opening strongly grabs attention and relates to the educational content	Opening gains some attention but is basic or loosely related	No attention grabbing opening
Active Learning	Encouraged Thinking	Clearly asks learner to answer, predict, solve, recall, interpret or reflect	Some attempt to encourage thinking	Entirely passive presentation
	Applied Learning	Clear example or real-world situation is used to apply or connect the	Example or connection is present but adds little to the learning	No example or connection to apply the learning

		learning		
Teaching Value	Supports Understanding	Explanation or example makes the topic clear and easy to understand	Topic is explained but some information is unclear or missing	Little or no explanation is provided
	Classroom usefulness	Video could be directly used to support teaching or learning a topic	Video could be useful but would need additional explanation or context from a teacher	Video provides little value for teaching or learning
